# Energy saving & effective control go hand in hand

## MiMA 25 LED wall mounting system

With its innovative design, the MiMA is recommended for use in homes, offices, shops and restaurants. The flytrap is constructed in such a way that the UV-A light is directed upwards. The MiMA trap has an all metal housing and uses a powerful UV-A lamp to lure insects into its trap. Once the insects enter the flytrap, they are effectively controlled by a glue board.

### LED lamps

LED technology offers clear advantages in terms of efficiency (lower energy consumption) and its footprint (compactness)

### Glue boards

Insects are caught on a glue layer, which preserves them over time. The caught insects can be counted and insect species can be analysed, which offers clear advantages in an IPM approach.

### 10 reasons to start using the MiMA 25 LED:

- Effective & proven design
- Energy saving UV-A LED technology
- 3 year lifespan (25.000 hrs) of the UV-A LED lamp
- Environmental friendly: no restricted chemicals used in the product design.
- RoHS / REACH / ISO and CB compliant
- Fast and simple maintenance of the unit.
- Optimized glue board offers fast catch results and a fast analysis
- High quality casing offers over 5 years of operational use
- Fast mounting and fast service

*Guarantee LED lamp: 2 years on electrical failures*

## Technical specifications

Area coverage	: 25 - 40 m <sup>2</sup>
Light source	: 1x 4 Watt ASTRON UV-A LED lamp
Type of UV lamps	: UV LED Lamps RoHS certified
Electrical supply	: 100-240 V ~ 50-60 Hz
Catch specifications	: By means of long life glue board
Power consumption	: 4 W
Weight	: 2 Kg
Degree of protection	: IP 20 (drip proof)
Guarantee	: 2 year return to base
Int. building norm	: acc. IEC-335-259 int. standard for insect exterminators
Lamp life time	: 25.000 hrs (*)
Dimensions (L x D x H)	: 440 x 190 x 200 mm
CE-approval	: Yes
Mounting position	: Wall mounted
Cable	: Included
Packaging	: Carton box included
Manual	: Enclosed with the unit in English
Service	: Unit can be dismantled without special tools

(\*) after 25.000 hours a loss of 30% in efficiency has to be expected and lamps need to be replaced
